Description of service(s)

I wish to offer services which will provide explanations of the super computer system and its use. I plan to create the following pages.

- How to use UNIX
- How to use databases
- How to use Sun Grid Engine
- How to use PC clusters
- Workshop schedule information
- Reference materials for use of service
- Service renewal record

I am applying with the goal of making the super computer system easier to use through the creation of these pages.

The page below will operate by CGI.

- Freeware version up application

This page will operate by Perl and send by mail the information input into forms.

Notes for when filling out the application

1. Students and student researchers must receive a signature or seal of approval from their supervisor.

2. Please have one person in charge of payment per laboratory.

3. The person in charge of finance is generally the head of accounting of the department to which the person in charge of payment belongs. If the person in charge of finance is an instructor of the Institute of Medical Science, the University of Tokyo, there is no need to specify the person in charge of finance on the form.

4. If you already have an HGC user name, please enter it into "HGC registered username" on the form.

5. You can also use own domain names. In this case, please set the IP address corresponding to the domain name to `202.175.151.62`.

6. Please make the user name w3 followed by the service name. If the user name is over 8 letters, please abbreviate the service name.

    (Example) `higet.hgc.jp  -> w3higet`
    `supcom.hgc.jp -> w3supcom`

7. The group name is identical to the user name.

8. You cannot apply for service names which are already in use.

9. The service created by this application will be active to the end of the fiscal year (March 31) of the date of application. If you wish to continue providing the service, please fill out a renewal application.

10. Please include one of the following statements in the main text or the Acknowledgments section of any papers published as a result of research that employed the HGC computer system: You may adjust the wording to fit into the text.
